**WORK EXPERIENCE**

**10/10/2014–Present**

### Research and Innovation Engineer

Overit S.p.a., Rome (Italy)

Analyst developer in the Research and Innovation Overit's Team. Responsible of analysis and development on innovative software for wearable devices like Google Glass, Epson Moverio for Augmented Reality applied to Field Management, Oculus Rift, cardboard and other types of headset using Virtual Reality.

I'm developing software for wearable like Apple Watch (WatchOS), Samsung Gear S (Tizen), Microsoft Band etc.

Thanks to this role I am continuously optimizing the research of new technological solutions and development languages, in addition to my deep knowledge in mobile devices field with Objective-C iOS and Android, on server side field using PHP and NodeJS, Linux and MongoDB to the big data managemnet. I also increased my expertise in C++ working on projects in OpenCV, 3D Development with Unity 3D (for mobile and desktop applications) and very different kind of IOT hardware and software solutions.

Acctually I'm working on IOT project using NodeJS technology.

**09/2013–09/2014**

### Head of iOS Application Development

Scooterino, Rome (Italy)

Scooterino is a community-based platform allowing users to share scooters rides, has been launched in Rome. Through the mobile app you can connect with fellow users driving their "motorini" in a similar direction to yours.

I have analyzed and developed the 1.0 version for iOS using both closed and open source frameworks.

I have been part of the team in charge of making ideas and change them into "real" products for the market.

**01/09/2009–10/10/2014**

### Analyst and Full Stack Developer

Into The Net S.r.l., Rome (Italy)

Full stack developer specialized in iOS/Android apps analysis and implementations.

I started developing several kinds of backoffices using Java (J2EE) and javascript frameworks. then my focus has been changed and my role become as a PHP analyst with a lot of skill in open source environment such as PHP/MySQL using Zend Framework. I realized different kind of web site, web services etc.

I become an expert in components, plugins and modules customization and integration for leading CMS like Joomla (from 1.5 to 3.x), Wordpress and Magento.

I managed whole projects on server side analysis of user interface implementation for mobile app, software and web.

I made several kinds of iOS applications focused on geographical data use (GPS), InApp Purchase, Local and Remote Push Notifications etc.

In the last two years in Into The Net i worked on:

- Web-based software architecture using LAMP (Linux, Apache, MySQL, PHP) and JavaScript

frameworks like jQuery, jQuery UI, Kendo, Sencha.- Web services analysis and implementations for an app used to manage and optimize the amount of data exchanged over internet. - Data bridge analisys and development of a Magento e-commerce and iOS app development.
